Wee One Quilt

Wee One Quilt

This quilt is assembled using the Sew and Flip Method. Each strip is sewn onto the foundation of the quilt, sewing through the strips, batting (optional), and backing, all in one step. Always place strips so the nap is going in the same direction. Use a 1/2" seam allowance.

1. Lay the backing on a flat surface with the wrong side up. If using batting, center exactly on top of the backing. Lifting one side of batting at a time, use basting spray on wrong side of backing fabric and carefully smooth batting onto backing.
2. Mark the center of batting/backing. Mark by measuring, or fold in half keeping the 29" wide horizontally.
3. Lay the desired middle strip of the quilt top centered on the marked line, making sure the nap is going down towards the bottom of the quilt. Use basting spray to secure in place.
4. Choose the next strip. Check to make sure nap is going towards the bottom of the quilt. Place strips right sides together, matching raw edges. Using a 1/2" seam allowance, stitch strip in place. Sew through the new strip, the middle strip, the batting (if used), and backing.
5. Spray the wrong side of the new strip, flip, and smooth in place. Repeat this process to the other side of the center strip.
6. Continue to sew strips, alternating from the center strip, making sure nap is all going in the same direction.
7. Trim edges and square up to 28" x 28".
8. Bind using 1 3/4" x Width of Fabric strips.
